1. Applicant's amendment, received 17 October 05, has been entered. The amendments to the claims have changed their scope and necessitated a new search. Due to the multitude of inventions claimed, this search is considered to be overly burdensome, and thus a restriction is now required, as set forth below. Note MPEP 811, which indicates that a restriction requirement can be made anytime before final rejection.

2. Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 4 and 15, drawn to a reciprocating tool having 1<sup>st</sup> and 2<sup>nd</sup> collar supports and a fastener receiving counterbore.
- II. Claims 5,6 and 16, drawn to a reciprocating tool having a resistance structure.
- III. Claims 7,8 and 17, drawn to a reciprocating tool having a retaining member.
- IV. Claims 9 and 18, drawn to a reciprocating tool having an overmold.
- V. Claims 10-12, drawn to a reciprocating tool having a rotation restriction lock.
- VI. Claims 21 and 22, drawn to a reciprocating tool having a reciprocating plunger.

3. Claims 1-3,13,14,19 and 20 will be examined with the elected invention. Claims 1 and 13 link the inventions of groups I-VI. The restriction requirement of the linked

inventions is subject to the nonallowance of the linking claim(s), claims 1 and 13. Upon the allowance of the linking claim(s), the restriction requirement as to the linked inventions shall be withdrawn and any claim(s) depending from or otherwise including all the limitations of the allowable linking claim(s) will be entitled to examination in the instant application. Applicant(s) are advised that if any such claim(s) depending from or including all the limitations of the allowable linking claim(s) is/are presented in a continuation or divisional application, the claims of the continuation or divisional application may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application. Where a restriction requirement is withdrawn, the provisions of 35 U.S.C. 121 are no longer applicable. *In re Ziegler*, 44 F.2d 1211, 1215, 170 USPQ 129, 131-32 (CCPA 1971). See also MPEP § 804.01.

4. Inventions of groups I-VI are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. For example, the reciprocating tool having 1<sup>st</sup> and 2<sup>nd</sup> collar supports and a fastener receiving counterbore of group I could be used without the resistance structure of group II. Conversely, the reciprocating tool having the resistance structure as in group II could be employed with non-counterbored fasteners. Given this two-way distinctness, the claims do not overlap in scope. See MPEP § 806.05(d).

5. There is an excessive burden on the office to examine all of these inventions together, as shown by their search beyond what has already been searched. See MPEP 808.02(C). For example, the search for group I would be in the fastener art, class 411, along with a text search for counterbores. The search for group II would not be as above, but instead would be in the resistance arts along with its own unique text search. Each of the remaining groups also has its own, different search.

6. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different search, restriction for examination purposes as indicated is proper.

7. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

8. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
